

MOT Register

A very simple but extremely effective module the MOT Register is designed, in common with other Platinum Software modules, for both multi-user operation and ease of use. This is useful to companies who test vehicles to department of Transport standards. The software covers the areas of, storage of the details of MOT's performed, reporting for the Ministry, and easy recall of information when a duplicate certificate is required. This Platinum software module can be used as a stand-alone product or will integrate directly with the Workshop Job Card software.

Mot Data Maintenance

- A simple to use entry routine to store all relevant MOT record information
- Simple to use & comprehensive MOT record searching by vehicle registration, date range or indeed any other stored information.
- Full listing of defect codes with their pass or fail status.
- Full logging of quality control tests performed.

Reporting

- Full, Ministry approved, period end reporting, including VT12 equivalent.
- Comprehensive user configurable Report Generator to design any screen or printed reports that you may require.
- Ability to export information to disk file, for use by third party software products.
